THASEEN SHABIK N

Electrical & Electronics Diploma Engineer

+91 90950 33435 | shabikthaseen514@gmail.com | Dindigul, Tamil Nadu, India

PROFESSIONAL SUMMARY

Process-focused Electrical & Electronics diploma engineer with practical shop-floor manufacturing experience at TVS Sundaram-Clayton. Experienced in shift operations, FANUC robotic cell programming and high-precision VMC operation, with training in 5S, safety management, telecom electrical infrastructure and modern digital tools.

PROFESSIONAL EXPERIENCE

TVS Sundaram-Clayton Limited - Oragadam Plant, Chennai — May 2025 - Aug 2026

Production Engineering Dept. / Shift In-Charge (OPED)

- Led day-to-day shift operations in the High-Pressure Die Casting division, meeting production targets and quality metrics.
- Operated teach pendants, optimised programs and made fine touch-up adjustments on 6-axis FANUC industrial robots.
- Supported Vertical Machining Center (VMC) operations: cutting, milling and boring with tool offset adjustments.
- Resolved on-floor mechanical and setup stoppages with technicians, reducing line breakdown time.
- Ran daily shift toolbox talks and kept strict safety protocols and 5S discipline across the workspace.

TECHNICAL COMPETENCIES

Robotics & automation: FANUC robot operation, program editing, teach pendant handling, touch-ups and calibration.
Machining & CNC: VMC operation, G-code and M-code editing, tool offset correction, boring, milling, cutting.
Electrical & design: SEE Electrical CAD, eSim circuit simulation, control schematics, single-line diagrams, telecom electrical infrastructure.
Shop-floor management: High-pressure die casting, 5S, root cause analysis, cycle time reduction, workplace safety.
Software: MS Excel, Word, PowerPoint, Teams, Outlook, OneDrive, SharePoint, digital payments, generative AI (ChatGPT).

ACADEMIC ENGINEERING PROJECT

Hybrid Power System with Renewable Energy Resources

- Built a demonstration model combining a 12 V solar panel and a 12 V DC motor used as a wind turbine to charge one 12 V battery.
- 150 W DC-to-220 V AC inverter powering a 10 W LED load; Arduino Uno with voltage and current sensors and an LCD for live monitoring.

EDUCATION

Diploma in Electrical and Electronics Engineering (DEEE) — 2022 - 2025
Government Polytechnic College, Usilampatti, Madurai — **78% - First Class with Distinction**

Secondary School Leaving Certificate (SSLC) — 2021 - 2022
Church of South India (CSI) Higher Secondary School — **60%**

TRAINING & CERTIFICATIONS

- **BSNL Madurai** - 25-day internship in Electrical Infra Management, Telecom Model (13 May - 10 Jun 2024).
- **eSim training, IIT Bombay (Spoken Tutorial)** - circuit simulation, passed the online exam (11 Mar 2025, score 71.43%).
- **Naan Mudhalvan x Microsoft** (Jan 2024) - 23 certificates: AI fluency, digital productivity, entrepreneurship, employability and communication skills.

Languages: Tamil, English | **Strengths:** diligent, patient, adaptable, self-confident
